

Two great options for you:

Burn Out³

A granular chlorine shock that when used as part of a BioGuard® Care System, provides crystal blue, sparkling water. Utilizing an advanced technology, it oxidizes organic contaminants that cause cloudy water, musty odors and eye irritation. Available in easy-to-apply one pound bags.

Shock Application: Apply 1 bag of Burn Out³ per 20,000 gallons of pool water every week, or alternatively 1 bag per 10,000 gallons of pool water every other week.*

Superchlorination/Kill Algae Application: Apply 2 bags of Burn Out³ per 12,000 gallons of pool water.*

CLC³

A multi-purpose granular chlorine that when used as needed, provides a residual source of chlorine to keep water clean and clear. It also works great as a superchlorination treatment for everything from cloudy water to high combined chlorine levels and algae growth. It is extremely easy to use and can be applied without the hassle of pre-dissolving. Available in an 8 lb. jug or a 25 lb. bucket

Sanitizer Initial Chlorination Dosage: Apply 1 oz. of CLC³ for each 1,000 gallons of water.*

Sanitizer Regular Use Dosage: Apply 4-10 oz. of CLC³ per 10,000 gallons of water.*

Superchlorination/Kill Algae Application: Apply 2 lbs. of CLC³ per 12,000 gallons of pool water.*

Shock Application: Apply 1 lb. of CLC³ per 20,000 gallons of water every week or 1 lb. per 10,000 gallons every 2 weeks.*

guarding more than your pool

Burn Out³ and CLC³

the powerful and
convenient way to
keep your water
sparkling clear

* Read and follow all package label directions

A powerful new way to get sparkling, clear blue water and keep it that way

Burn Out³ and CLC³ from BioGuard[®] are a fantastic new pool care option with all the strength, convenience and safety features you need. These sanitizer and shock products can quickly get your pool in shape and help you easily maintain the beautiful water they create.

now 23% stronger!

This new 57.8% active formulation steps up the sanitizing and shocking power of our older formulated products, Burn Out Extreme[®] and CLC² – meaning you will get more free available chlorine per application to kill bacteria and germs, clear cloudy water and remove harmful contaminants from your pool.

a key part of your pool care system

When used as part of a BioGuard Care System or for other periodic maintenance, both Burn Out³ and CLC³ will protect your pool from contaminants that cause cloudy water, musty odors and eye irritation. They also work to keep your pool free of algae growth and help eliminate disease-causing organisms when used on a regular basis.

easy to use and apply

This fine granular formulation comes in convenient one pound bags or in jugs and buckets that make application a breeze. Just follow the user-friendly application instructions on the labels and you'll see

results in a hurry. It requires no pre-dissolving if applying to water more than 4 feet deep and above 65° F, but in pools with potentially bleachable surfaces such as vinyl, paint, fiberglass or colored plaster, you will need to brush any undissolved product from pool surfaces.

powerful, yet secure

Despite its improved cleaning and preventative power, Burn Out³ and CLC³ feature an improved fire safety profile that meets the NFPA criteria for a Class 1 oxidizer just like our previous products. It shows we care about protecting you and your family just as much as we care about protecting your pool.

key product features and benefits:

- **23% stronger than previous formulations**
- **Maintains brilliantly clear water**
- **Destroys organic contaminants**
- **Quick-dissolving**
- **Suitable for vinyl and plaster pools**
- **Improved fire safety profile**

They're all-around performers!

Use them as part of your routine maintenance system, to shock your pool or to get rid of algae growth.
